Projects

- ★ **Corporative website web developer**
SKY COMITÁN
February, 2024 - Present

I led the development of Sky Comitán's informational website, detailing the company and its services. I used Astro to enhance the site's fluidity and Next.js to ensure efficient navigation in the admin panel. I integrated Supabase to enable owners to manage website data using asynchronous CRUD operations.

- ★ **Web developer for a Management System**
COLEGIO DE ARQUITECTOS DE COMITÁN A.C.
August, 2023 – December, 2023

I led the development of a website application for the Colegio de Arquitectos de Comitán A.C., including management of private documents and article publication. I implemented user registration functions and content creation/editing capabilities. I collaborated on the design of both the front-end and back-end, integrating React.js and Supabase to ensure a smooth and functional platform.
